

The FAA Safety Team presents:

ICE is not NICE!

Winter weather in the New England area can adversely affect flight operations. Poor weather conditions with fast moving fronts, strong and gusty winds, blowing and drifting snow, and icing conditions are just part of the conditions that require careful planning in order to minimize their effects. Operation in this environment requires special winter operating procedures. What are the procedures that you use for dealing with winter weather? Attend this informative briefing presented by featured speaker Jim Adams, FAA Safety Team Program Manager and refresh your skills on winter flight operations, including flight into icing conditions. Refreshments generously provided by The Worcester Area Pilots Association. If inclement weather is forecast, please call 860-654-1039 for a seminar status message.

Directions: Program held in the airport terminal building. Free parking. Visit the Map Link for directions. Aircraft Parking at Rectrix FBO, 508-755-5870.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
